Some of the technology items to focus on between the IT Department and Board of Elections are: email, servers and switches, telephones, security system and cameras, and website updates. Other matters of importance are: emergency power, generator location, snow removal, and general building maintenance.

Mr. Walder related examples of his issues with the new building construction, including no space for IT department, size of generator, alternative fire suppression system for critical IT equipment and several other problems. Mr. Walder indicated he was able to resolve some of the issues but not all of his concerns were resolved.
